- Recommended Retail Price (RRP). Prices subject to change and does not include retailer charges
- ¹ Motion Clarity Index (MCI) is a dynamic indicator of the clarity of fast moving objects on LG TVs. MCI incorporates the panel frame rate, motion interpolation image processing and backlight scanning technology all of which work together to reduce blur in fast moving video content like action movies and sports. 2 FreeviewPlus uses HbbTV technology which combines broadcast and broadband. Internet connection is required.
- Data usage charges and conditions apply.
- ³ Internet connection required. Internet usage charges and conditions apply. WebOS internet browser supports HTML5, VP9 and HEVC.
- ⁴ Voice recognition feature is not available in all languages and dialects. Actual performance may vary depending on the language spoken and surrounding environment including ambient noise.

 Miracast compatible Android device required for this feature.

 Dedicated USB Hard Drive (min. 40GB) required for longer recordings and live playback function (sold separately).
- Internal memory capacity is 8GB.

 7 Intel WiDi enabled PC must be in range of the TV.
- 8 'LG TV Plus' on compatible Android devices (Android 4.1+). Phone must be in range, on the same Wi-Fi network
- ⁹ Some brands not supported, check product for details.
- ¹⁰ Uses Bluetooth 4.0 technology to send audio to compatible LG home audio products
- Netflix provides content in SD, HD and 4K Ultra HD. Netflix requires a steady internet connection speed of at least 25mbps to stream 4K Ultra HD content, otherwise content will be downscaled to either HD or SD quality based on the available bandwidth. Speeds of 25mbps available in limited locations and may vary depending on time of day. Please check with your internet service provider to confirm the bandwidth speed for your connection. Data usage charges apply.

IPS Panel

The secret behind LG TV's incredible viewing angle and picture quality is the panel. The IPS Panel is the reason why LG TVs have amazingly clear, consistent colour reproduction at wide viewing angles. We're renowned for it.

LG's Next Generation 4K Ultra HD TV range has arrived in 2015!

With a powerful Quad Core Processer, 6-Step Upscaler, webOS 2.0 Smart* TV and ULTRA Luminance technology, the UF850T series sets the trend for viewing pleasure. It's a breathtaking viewing experience with incredibly crisp vision, even when viewed from close distances. With over 8 million pixels and four times the definition of Full HD, you'll really notice the 4K Ultra HD difference.

With the 2015 6-Step Upscaler, all content is powerfully upscaled for clearer, more striking images. The sound is designed by harman/kardon®, delivering impressive sound to enhance whatever you're watching.

ULTRA Luminance technology enhances the lightest and darkest parts of the displayed content. It's achieved by adjusting the backlight zones to optimise image luminance, boosting the light areas of the picture.

The IPS panel used by LG is the reason why LG TV's have amazingly clear, consistent and sturdy screens, combined with local dimming LED backlights for enhanced image contrast. It also features webOS 2.0, our Smart TV operating system that's been updated in 2015 for even quicker and simpler access to content you love most* (including Netflix!). Uniquely engineered, it's Smart TV made simple.

*Internet connection required. Internet usage charges and conditions apply.

LG webOS Smart* TV - quick and simple access to the content you love most. Uniquely engineered, it's Smart TV made simple.

6-Step Upscaling

Upscale non-4K ULTRA HD content The 4K ULTRA HD Engine upscaler enhances the detail of non-4K ULTRA HD content in 6 stages to augment the image clarity closer to ULTRA HD quality.
